

# WHAT TO DO IF YOUR TOOTH IS KNOCKED OUT

When a permanent (adult) tooth is knocked out whole, you should try to reposition it.

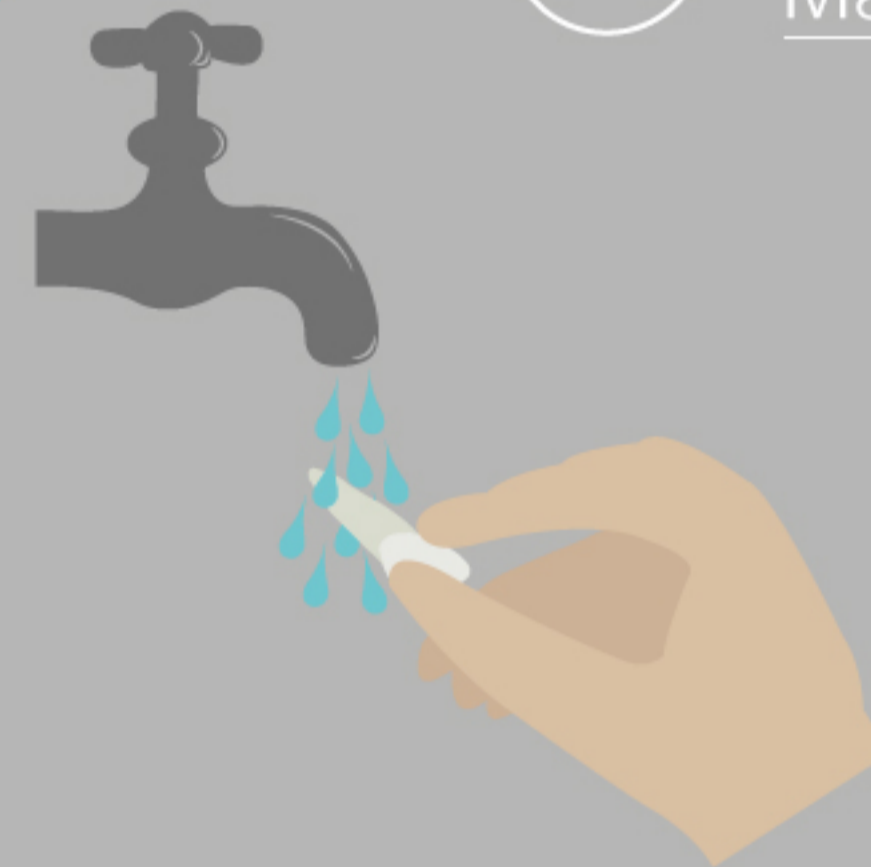

Only touch the tooth by the crown. Try not to touch the root.

1

Do not touch the root

2

10 seconds  
Maximum

If dirty, wash it briefly under cold water (Plug the sink)

3

Try to reposition the tooth, root first (The pointy end)

4

Bite down on a clean hanky to support the tooth and go straight to your dentist

If you cannot reposition the tooth, put it in some milk and go straight to your dentist.
